

Overview

The TM1 mug press Secabo is ideal for comfortable performing Sublimation ceramic cups and similar objects. Secabo TM1 transfer press is suitable for both beginners and professional users and their digital controller to operate quickly and safely. The pressure can be easily adjusted via a handwheel. Optional 3 different heating elements - also in conical design - available. Supplied with a heating jacket for cups with 80-90mm diameter is the mug press Secabo TM1, incl. Contained. The cuff is busy for about 700 transfer operations and can be ordered depending on the wear anytime. We also recommend the mug press turn on only for the actual use and not continuous heating.

features

digital controller

Time and temperature are set within one digital controller.

Variable working pressure

the pressure can easily be adjusted - depending on the technology and object

Working safely

The safety and quality of the machines is permanently controlled by German safety standards

Exchangeable heating sleeves
