

Overview

The clam presses Secabo TC5 and TC7 can be easily converted into a convenient double-plate heat press. All you need is the new Secabo Slide. In some easy steps the Slide is mounted onto the frame of the heat press. The Slide is based on the well-known quick-change-system and enables the user to slide to the left and to the right with little effort. Included in the scope of delivery is also a Beam-adapter, to further use the original base plate. All available exchangeable base plates are suitable for the Slide and can be changed within seconds. Available for the current models of the TC5 and TC7.
