BUILDING

WINDOW FILM

Construction, renovation, insulation...

We are all part of tomorrow's energy-efficient future!

To meet environmental challenges and limit seasonal discomfort for users of indoor spaces, HEXIS is launching a range of tinted films combining visual appeal, protection and innovation.

With its 35 years of expertise in the design of self-adhesive films, HEXIS has named its new line of solar films for buildings SKYLINE.

A perfect blend of innovative technology, safety, style and health protection.

THE **BENEFITS** OF **SOLAR FILM** FOR **BUILDINGS**:

TEMPERATURE CONTROL

reflects and absorbs part of the solar infrared radiation

PRESERVES VISUAL COMFORT

reduces glare

ABSORBS ULTRAVIOLET RAYS

between 95 and 99.9% depending on which film is used

HAS AN IMMEDIATE EFFECT ON ENERGY CONSUMPTION

reduces the amount of heat lost during the winter

ENSURES LONG-TERM PROTECTION

depending on the type of film, its orientation and the geographical location

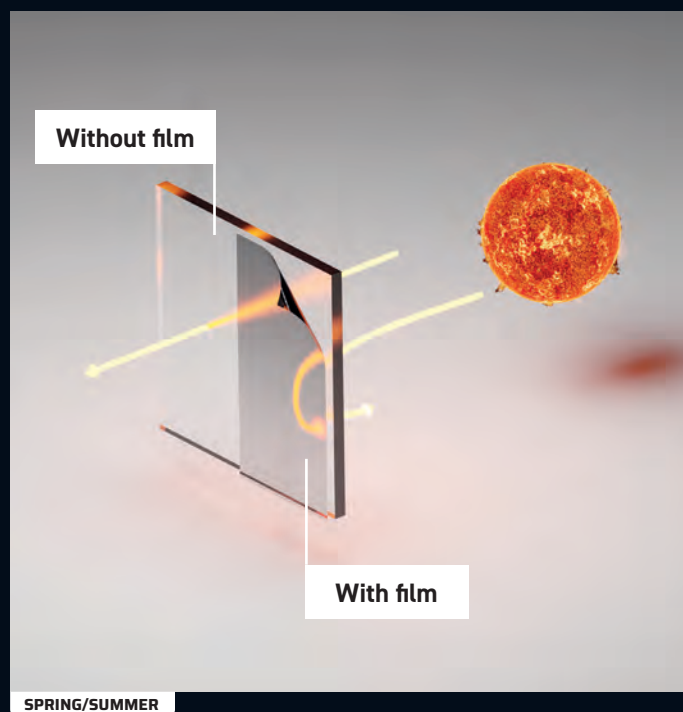

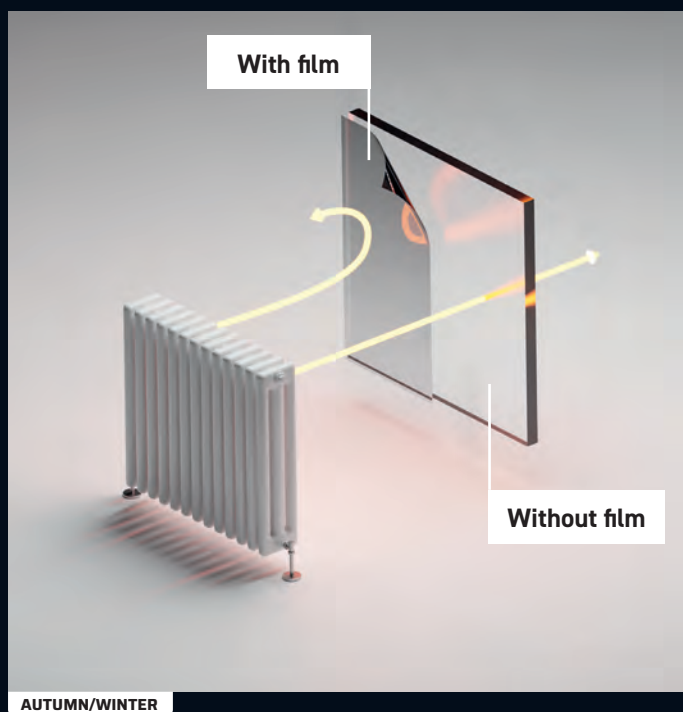

AVAILABLE IN A VARIETY OF EFFECTS

neutral, mirror, tinted, coloured, graduated, dichroic

WHY COMBINE **SOLAR FILM WITH WINDOW GLAZING ?**

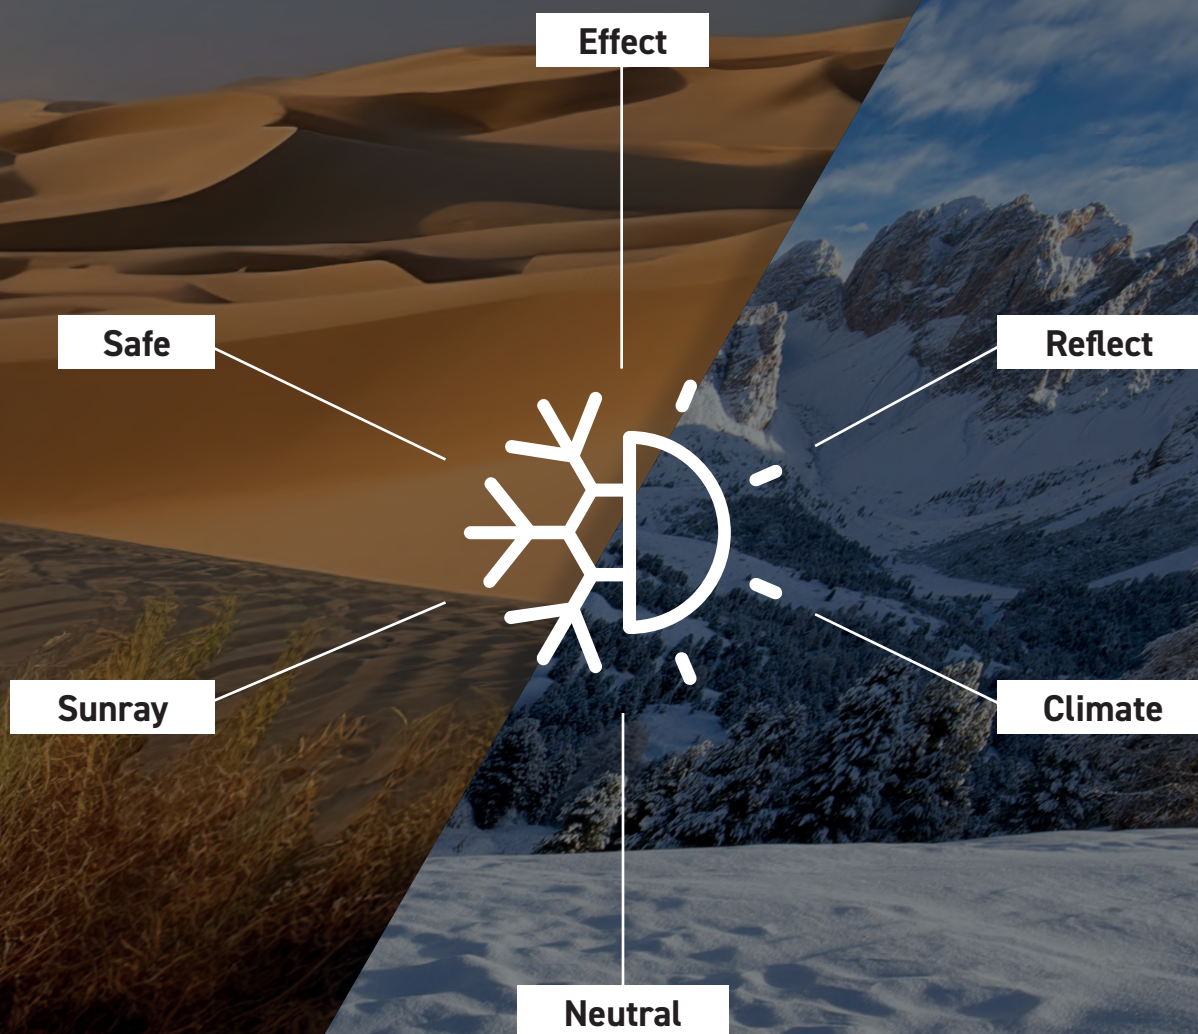

All year long, light radiation and the energy it releases through windows create considerable overheating in buildings.

To tackle the problem of energy loss in all seasons, whatever the glass used and the type of building (residential, commercial, industrial), one of the alternatives of choice is to adopt solar film.

CHOOSING THE SKYLINE RANGE OF
SOLAR FILMS IS YOUR GUARANTEE
OF IMMEDIATE, PROVEN ENERGY
SAVINGS.

HEXIS +: SKYLINE solar protection films for buildings do not require any special maintenance, just the use of a pH-neutral soapy solution. To make your choice even easier, SKYLINE solar protection films are compatible with all types of glazing*.

*It is strongly recommended that you consult the technical documentation for SKYLINE films prior to each specific installation.

REFLECT

CONTEMPORARY STYLE

REFLECT reflective solar films provide an elegant finish to windows while reducing solar heat and minimising glare.

Filtering part of the natural light, REFLECT films create a mirror-like appearance from the outside while maintaining a perfect view from the inside.

- REFLECT15X
- REFLECT20
- REFLECT35
- REFLECT35X
- REFLECT50
- REFLECT50X

CLIMATE

PROTECTION FOR ALL CIRCUMSTANCES

CLIMATE solar films are state-of-the-art technology in terms of protection against heat and energy loss.

Based on nano-ceramic technology, CLIMATE clear and tinted solar films optimise the thermal comfort of buildings, while achieving considerable energy savings.

- CLIMATE40
- CLIMATE45
- CLIMATE80X

NEUTRAL

THE ULTIMATE IN ELEGANCE

NEUTRAL solar films offer the same effective solar protection as REFLECT films.

Their lightly tinted appearance filters out part of the natural light while reducing the risk of glare.

- NEUTRAL20X
- NEUTRAL50X

SUNRAY

COLOUR PERFORMANCE

Coloured SUNRAY solar films combine visual appeal with protection against the solar heat.

They are available in blue and bronze tints to enliven the exterior appearance of buildings.

- SRBLUE20X
- SRBRONZE20
- SRBRONZ20X

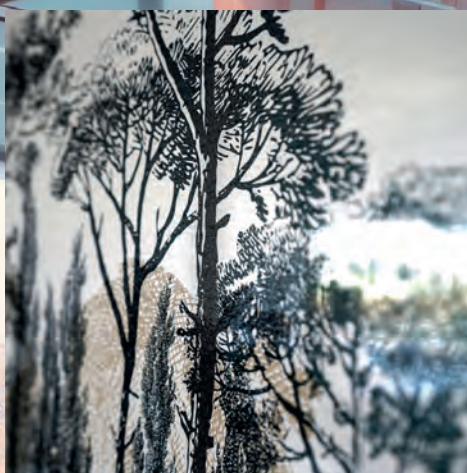

EFFECT

THE ARTISTIC TOUCH

EFFECT, a range of self-adhesive graduated/dichroic/textile effect/mirror decorative films.

They can be used to finish all of your windows, shop windows or glass partitions. These privacy films meet the need for confidentiality in different interior spaces.

- MIRROR 
- SHIELD 
- MIAMI 
- DUBAI
- GLASGOW
- GRADIENT1 
- GRADIENT2 
- LINPRINT* 

SAFE

COMPREHENSIVE SAFETY

Clear, anti-scratch and anti-break-in SAFE films help prevent damage and delay burglaries.

Due to the reinforced adhesive and the specific thickness of the films, the SAFE range resists shocks and attempted break-ins.

- SAFE100
- SAFE100X
- SAFE200
