Powered by **Dimatix** FUJIFILM™ | **RediJet**™ | ONYX **rip**

A wide range of applications solution!

With continuous ink recirculation and robust repairable construction, **Dimatix Starfire 1024** print head delivers unparalleled saturation and smooth gradient.
GnTek recirculation solution!

GZ Negative pressure recirculation system with pressure balancing unit and pressure protection unit assures steady ink delivery and minimum maintenance.
Intelligent IR drying system!

Intelligent IR drying system with industrial power switches could synchronously treat the printing evenly and efficiently. With the springs and metal net, it is uneasy to get broken and more safe.

More durable and precise body!

Reinforced CNC aluminum beam, dual linear guide and enhanced printing platen assure high speed, high resolution printing and prevents deforming during transportation.

Optimized feeding and taking up system!

Feeding system with redesigned media holder is for easier and humanized operation. Taking up system with pneumatic shaft and dancer bar enables more precise taking up.

Optional: Separate taking up system!

Separate media taking up system with IR drier could dry the printing thoroughly during high speed printing. An additional roll saves media switching time to speed up production.
