Dimatix GMA33 print head

GMA33 print head is a compact, durable, full silicon MEMS print head. 5pl dropsize, closed nozzle lines, RediJet in recirculation, high frequency and various drop make it ideal for both high speed and high quality printing.

GZ Variable Dot Technology

GZ Variable Dot Technology delivers flawless skin tone, smoother gradient, crisp text and intricate detail without losing speed.

Gntek Dual Negative Pressure

Auto Capping&Wiping System with aluminum base perfectly cleans the print head nozzle face to achieve excellent printing quality and extend the print head life.

Dual rolls feeding system

Dual rolls feeding system doubles the productivity while printing short media. Taking up system with air shaft enables accurate and stable media rewinding.

Robust, durable and precise body

Reinforced CNC aluminum beam and dual linear guides assure high speed, high resolution printing in a long run.
* Double linear guides than regular.

Panasonic A6 servo system

Panasonic A6 servo system has high torque and low vibration, assuring more stable and accurate printing.
* Others use regular Chinese brand.
